J36 LOADING DATA

The following loads are working loads in test firearms and many of the rifles that we have loaded for customers but may not be safe in any other firearm. Loads can vary quite a bit for different rifles, so we cannot guarantee that these loads will be the best ones in your rifle. If more than one load is shown for a given bullet weight and cartridge, they will be listed in our order of preference. You should reduce your powder charge by at least 6% for your starting loads and check for pressure signs.

<u>CARTRIDGE</u>	<u>J36 BULLET</u>	<u>CASE</u>	<u>PRIMER</u>	<u>POWDER/WT.</u>	<u>VELOCITY</u>
243 Winchester	80 gr.	WW	CCI200	H4831/47.0	3300
